July 28, 2020

Mission and Objectives

JAMMEX

Joint Additive Manufacturing Model Exchange

Mission

Provide a secure web-based system to collaboratively share 3D models across DoD in support of additive manufacturing.

Objectives and Benefits

JAMMEX

Enhance supply chain efficiency

Reduce lead times with real time access to data

Address obsolescent parts and hard to procure parts

Alternate sources of supply

- Leverage the available 3D models of all the services and allowing cross-service access
- Streamlined collaborative process where approved models can be easily shared, searched, and downloaded
- Flexibility to support a variety of file formats
- Flexibility of being able to link to different systems using API (so users don't have to conform to one tool)

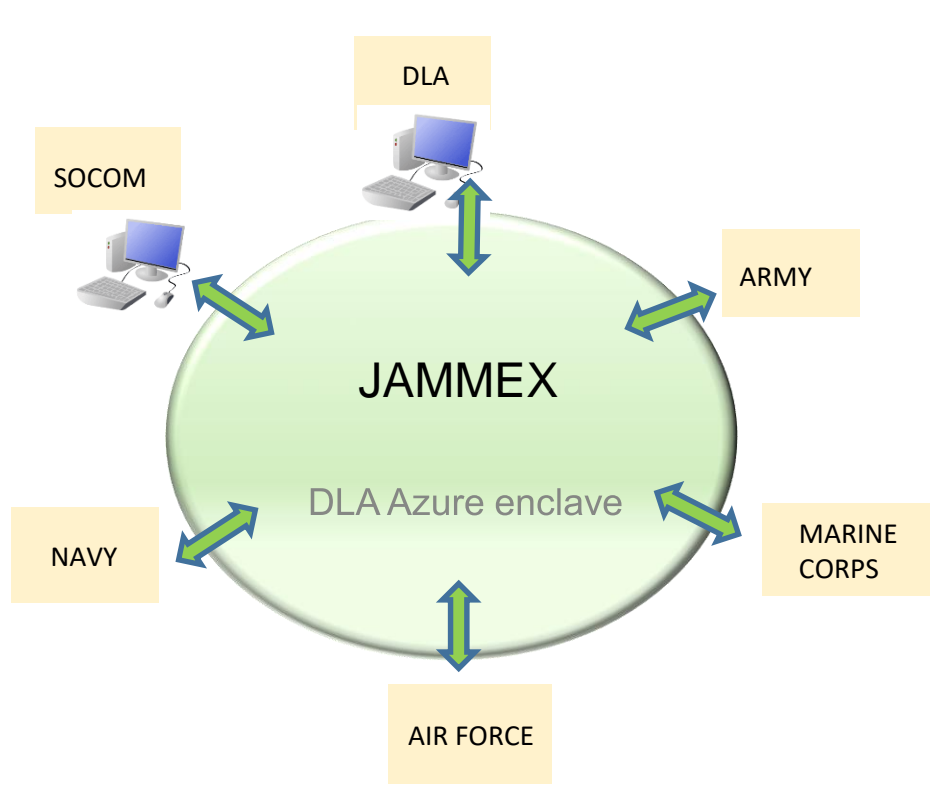

Data Flow and Users

JAMMEX

Joint Additive Manufacturing Model Exchange

 - Internal repository within JAMMEX

Total Number of Models:
175

Services – 144
DLA COVID-19 - 31

Current # of users: 91
